

**SFR SCCA announces 2nd 2010 Tire Rack Street Survival June 19, 2010,
@ Candlestick Park, San Francisco, an event to help Save Young Lives.**

www.streetsurvival.org

Along with the freedom and excitement of receiving a driver's license, comes the serious responsibility of being a safe and educated driver. The sobering statistics on the number of teen drivers involved in traffic incidents has prompted the Sports Car Club of America Foundation to become a partner with The Tire Rack® Street Survival program, giving young drivers, and their parents, access to the wealth of expertise SCCA members have to offer.

Developed by the BMW Car Club of America and the BMW CCA Foundation in 2002, The Tire Rack Street Survival® teen driving schools are expanding across the country and have enlisted the support of the Sports Car Club of America (SCCA) for its growing network of classes (70+ in '09).

The registration fee of \$75.00 provides students with experienced instructors who safely guide them through a day of behind-the-wheel instruction and short classroom sessions. Driving skill courses are specifically designed to mimic everyday driving hazards, obstacles and challenges. Students will use the vehicles they are most familiar with, which is usually their family or personal car, truck or SUV (*Restrictions May Apply).

Parents are urged to talk to their teen drivers about the advantages of attending this one day program. Eligible students are 16 to 21 years old and hold a valid, unrestricted driver's license. Students should have 6 months driving experience and parents should make plans to attend the programs along with their teens.

Parents can register their teen drivers on-line at .

How big a problem are accidents and deaths from teen driving?

- The leading cause of death among 13-19 year olds in the US is from a motor vehicle crash.
- 62% of teenage passenger deaths in 2004 occurred in vehicles driven by another teenager.
- Teenagers cause 2.5 million accidents per year.
- In 2007 that resulted in over 6,000 deaths of teens.
- Only 4% of California's drivers are between 15 and 20, but they account for 66% of traffic fatalities.
