* Driving Skills School (name still tentative) – is a program oriented toward someone with no previous advanced driving experience, plus the occasional experienced driver who would like a review of the basics and polish their skills. Limited to two run groups of 15 each, drivers will spend almost half the day in their cars perfecting car control skills, performing drills on the world class Thunderhill road course in a controlled environment, walking key parts of the track, and enjoy being a part of small group sessions that will build confidence, competence and provide a lifetime experience for participants. Graduates will be ideally suited for a more safe driving career on the public highways, and if they choose to, be thoroughly prepared for a Hooked On Driving track day program as well.
